**REMINISCE**  
reverb / delay

**essence**

essence is an adjustable sample rate that sets the overall essence of the pedal by setting how lofi the pedal sounds and modifying the delay time & reverb decay.

**douse**

douse your sound in our signature shoegaze & dream pop guitar sounds with this blend control. reminisce goes 100% wet.

**reverb / delay**

blend between reminisce's dual modulated reverb, reverse delay & forward delay.

**overflow**

controls the overflow of cascading delay feedbacks.

**reverse textures**

blends the reverse component with the direct signal for unique textures.

**pitch blend**

blend reminisce's reverbs & delays with vintage style pitch shift.

**pitch shift**

controls the frequency of the pitch shift, +/-1 octave.

**tap / muse selector**

choose between tap tempo or a musing freeze effect.

**tap led**

indicates delay tempo.

**tap / muse led**

red indicates tap tempo, blue indicates reverb freeze.

**muse**

an effect for musing. take a moment to reminisce by freezing the reverb or tap in the desired tempo for the forward & reverse delays.

**reminisce**

the reminisce bypass footswitch opens up a world of ethereal effects.

**peak led**

the input path has compression & limiting so the peak led gives an idea of how hard you are driving the pedal.

power: 9v, 150mA
